

## FRENCH TOWN PAYS TRIBUTE AT GRAVES OF 27TH'S HEROES

Mayor of Bony Writes O'Ryan of Ceremony Year After Hindenburg Line Attack.

Major Gen. John F. O'Ryan made public today a letter he recently received from the Mayor of Bony, a town in Flanders, which was taken from the Germans by the men of the 27th Division in the terrific and bloody assault upon the Hindenburg Line Sept. 27-30, 1918. The letter tells in simple, touching language of a tribute paid by the people of Bony to the dead of the 27th who are buried in an American cemetery near the town. Mayor Pigorand's communication reads:

"BONY, CANTON DU GATELET, AERON SAINT QUENTIN, France, 7 October, 1919.

"General—I have the honor respectfully to inform you that on the 28th of September last, the anniversary of their deliverance by the 27th American Division, the inhabitants of Bony, of which I am the Mayor, went piously carrying the homage of their gratitude to the dead of the American cemetery at Bony and there deposited a garland wreath upon their ashes.

"The 1,650 white crosses of this cemetery of the brave ones appeared at a distance like a large and un-sullied covering of snow spread before us without a break. We were also reminded that these young, heroic and superb men had sacrificed themselves in the defense of the oppressed of the world and more particularly for our defense.

"The French of Bony, we shall never forget what we owe to the division of New York, for we can see anew shining above our ruins the sun of liberty, tradition and ideals. And our ravaged country shall forever be to us the holier and more beloved, for it is colored with the blood of so many young, noble and mourned Americans.

"I pray you to accept, General, the expression of my deep consideration.

"PIGORAND, Mayor of Bony."

Gen. O'Ryan, in a letter of thanks and appreciation, said that he believed the dead of his division, could they give expression to their sentiments, would voice no regrets because

they made the great sacrifice to aid the French people in their struggle for existence. Continuing, the General wrote:

"I have reason to believe, too, that could their preference be consulted, they would, with almost unanimity, prefer to lie together on the field of their sacrifice rather than to be dispersed and reinterred in more than a thousand other places in America.

"This view is shared by the large majority of the living of the division and in no small measure are their sentiments influenced by the keeping of those who will ever revere their memory and guard their sanctuary with an affection and reverence not to be excelled.

## PASTOR KILLS HIMSELF.

Rev. Norman McKinnon Cuts Throat With Razor in Hospital. HARRISON, N. Y., Dec. 8.—The Rev. Norman McKinnon, fifty-seven years old, pastor of a suburban church in Boston and a brother of John W. McKinnon, a broker at No. 29 Broad Street, Manhattan, was found dead yesterday, having cut his throat with a razor in the Hygienic Institute at Purchase, five miles north of this place. Dr. McKinnon had been under treatment in the institute for six weeks, but on Saturday had announced his determination to return to his home in a few days.

Make this Test Yourself---It will tell you which is the BEST PHONOGRAPH

At the Edison Shop we are making a Test which has astonished all music-loving New York—the Edison Turn-Table Test.

This Test will convince you that there is a best in phonographs—and it will tell you which phonograph is best.

On a revolving platform we have placed The New Edison and three other leading phonographs.

One after another the same selection is played by each phonograph. The platform is turned so that each phonograph, when played, stands in exactly the same place as the others. Thus, playing conditions are equalized. No instrument is given a better position than another. When you have heard all four phonographs play the same selection from the same spot in the testing-room you know which is best.

Because this comparison is purely a service to the music-loving public, it will be given only at your request. Hear it, even though you do not want to buy a phonograph immediately.

The manufacturers of the phonographs used in these Tests are invited to inspect them, to regulate them, or to substitute other machines of equal or greater value, at any time during business hours.

Come in to-morrow and ask to hear the Turn-Table Test. And see the beautiful Period Models of The New Edison, priced from \$167.50 to \$5,500.

## CHIROPRACTIC

Nervous energy—the force that can take a simple idea and turn it into a bridge spanning a mighty chasm or a railway connecting the far places of the earth. Nervous energy—that paints the world's pictures, writes the world's music—keeps in motion the whirling wheels of industry—builds cities—brings the flush of health to the cheek and the spring of youth to the step—creates the smiles and laughter and friendliness of the world—that makes life worth living.

Without its supply of nervous energy, no organ or part of the body can perform its regular functions. Interfere with or cut off this supply and the manufacturing operations within the body, which mean life and health, are slowed up or stopped. The same principle applies to the elimination system which carries away the poisonous waste of the body. Interfere, for instance, with the supply of nervous energy flowing to the kidneys and kidney trouble will result. Of course, this reference to the kidneys is made only as an example. With an interference at another point some other organ would be affected.

The chiropractor, the master mechanic of the nervous system, with deft and practiced hand, removes the pressure that is interfering with the flow of nervous energy to the body. Then Nature takes up the task of restoring diseased organs, weakened bodies, to health.

Before consulting a Chiropractor always make inquiry of the Chiropractic Bureau of Public Information. Address all inquiries to C. B. Box 50, The Evening World, New York City.
